Example 2

transition_reveal

```
p + transition_reveal(YDAY) +  
geom_point(  
  aes(x = YDAY, y = TEMP,  
        colour = location,  
        group = seq_along(STNID))  
)
```

Example 2

transition_reveal

```
p + transition_reveal(YDAY) +  
  geom_point(  
    aes(x = YDAY, y = TEMP,  
         colour = location,  
         group = seq_along(STNID))  
  )
```

Example 2

Static Version

```
p ← ggplot(january) +  
  geom_smooth(aes(x = YDAY, y = TEMP,  
                  colour = location)) +  
  scale_colour_brewer(type = 'qual') +  
  theme(legend.position = 'bottom') +  
  labs(x = 'Day of Month',  
       y = 'Temperature (celcius)',  
       colour = NULL)
```
