

Otoño de nuevo By elosoenpersona

Monasterio de Hermo, Asturias

**W**e're talking about a nature and a leaf:  
Here not even a broccoli and absolutely not a radish

a scene with a representation of a blossom where you saw something

no way a broccoli and not an antelope

stories about a photo of a vegetation beside another like it

Still, almost no chance of a broccoli and absolutely not a beet

like a record of a grassland

Considering not even an elephant not even a cauliflower  
beside a record of a grass before another story started

Consider more the idea of an ecosystem and a vegetation.

BTW - before I post any these I always make sure that it did not just copy them from the training data.
